

**IACA**

INTERNATIONAL  
ANTI-CORRUPTION  
ACADEMY

WEBINAR

# CELEBRATING THE INTERNATIONAL ANTI-CORRUPTION DAY AT IACA

## OVERVIEW

The aim of the event is to present our vision for future IACA's contributions to the global efforts to prevent and fight corruption and promote compliance. Taking into consideration new realities, available resources, and lessons learnt acquired in recent years, we would like to discuss with IACA's stakeholders, including Constituency, Organs, Lecturers, and Alumni, the role of the Academy and activities it is going to implement.

The recently adopted Work Programme 2025 - 2028 demonstrates IACA commitment to look for more efficient and effective ways to advance global anti-corruption efforts. In the next few years, the Academy will aim to strengthen its cooperation with its major institutional partners, particularly the United Nations, as well as with regional and

national anti-corruption academies and universities. We are also working to launch a Ph.D. programme to foster cutting-edge research. Furthermore, we will enhance technical assistance activities to drive meaningful change worldwide.

The event will be opened by the Dean. Academic Programmes, Training and Capacity Development, and Research and Analytics departments will provide presentations on the general vision for IACA's future activities in their areas of work. Referring to these presentations, four commentators will focus on strategies to maximize the benefits of IACA's activities. Subsequently, the audience will be invited to provide their views on future activities of the Academy.

## OPENING REMARKS
